

3MICT

<i>Sukhorolsky M.A., Kostenko I.S., Sorokaty M.I., Lubytska O.Z.</i> Fourier method employed for solving thermoelasticity problems for rectangular plate with opening and inclusions	3
<i>Banaś M., Hilger B.</i> Project management of carbon dioxide produced during operation of low power boiler in small town in Central Europe	8
<i>Kołodziejczyk K., Banaś M., Warzecha P.</i> The impact of geometric parameters of settling tank on the resulting the distribution of the flow of suspension with the use of counter-current and cross-current multiflux sedimentation	14
<i>Kowalski W.P., Kołodziejczyk K., Banaś M., Turlej T.</i> Evaluation of the sedimentation rate of coal suspension implemented in the multiflux system with flocculant	21
<i>Wróbel J., Okulicz K.</i> Computer support of innovation in engineering design	29
<i>Waluś Konrad J.</i> Comparison of the maximum acceleration of a passenger car on selected pavements in wintertime	34
<i>Bulakh B.</i> Analysis and implementation of computing workflows for service-oriented CAE/CAD software	39
<i>Kyrysha B.</i> The advanced microstrip X-junction broadband RF model for circuit CAD/CAM software	45
<i>Bondarchuk V., Tkachenko S.</i> Development of the subsystem of the automated generation for the public transport alternative routes with changes	49
<i>Stekh Y., Artsibasov V.</i> Adaptive clustering algorithm for recommender systems.....	55
<i>Jaworski N., Farmaga I., Lobur M.</i> Finding effective thermal characteristics of composite materials based on the analysis of thermal conductivities	59
<i>Matviykyv O.M., Faitas O.I.</i> Data classification of spectrum analysis using neural network	66
<i>Stekh Y., Artsibasov V.</i> Models and methods for building web recommendation systems	75
<i>Zhezhnych P., Hirnyak M.</i> The architecture of the electronic encyclopedia formation system on the basis of open texts	79
<i>Kosobutsky P., Hanas Yu.</i> Application of envelope function method for multibeam interference extremums to the ellipsometry electromagnetic waves by single-layered coatings	83
<i>Lobur M., Holovatyy A.</i> Development of macro-parametric method for integration of heterogeneous CAD systems and structure of integrated computer-aided design subsystem for MEMS motion sensors	87
<i>Andriychuk M.I.</i> Non-destructive testing of materials based on the wave scattering by the small particles	93
<i>Bugeda L., Tkachuk V.</i> Questions on optimization of trunk mail transportation	101
<i>Kurylo O., Romaniuk A.</i> Polarity lexicon development for sentiment analysis.....	105
<i>Markelov O.</i> Database of visual and source code components of user interface: information model design	109

<i>Lobur M., Farmaga I., Shmigelskyi P.</i> Evaluation the solution time of finite element analysis using gaussian elimination	114
<i>Kosoboutskyy P., Karkulovska M.</i> The regularities of multibeam acoustic waves interference in MEMS cavity-type structures without shear stress. Analysis by the envelope method.....	117
<i>Lobur M., Romaniuk A., Romanyshyn M.</i> Defining an approach for deep sentiment analysis of reviews in Ukrainian.....	124
<i>Lobur M., Romanyshyn M., Romaniuk A.</i> Sentiment-annotated corpus of reviews in Ukrainian	131
<i>Stupnytskyy V.</i> Subsystem of rheological forming modelling in integrated CAD/CAPP/CAM system in machine building	139
<i>Vasyliuk Ia., Teslyuk V., Denysyuk P.</i> MEMS data transforming method for ontological models	143
<i>Karkulovskyi B., Teslyuk V., Kernytskyy A.</i> Modeling method for mechanical microsystems elements	147
